FOOD SAFE

The Bond basket, with even higher capacity! Designed to carry up to 91 liters, it is the largest rolling basket in the market. Thanks to its square-shaped wide bottom, bulky products will fit in easily, making the most of the basket's capacity.

SB | RAMPBRAKE

Ramp brakes, escalator brakes and uneven floors.

How does it work?

THE WHEEL DOES NOT TOUCH THE GROUND

The basket rests securely on the ramp or escalator, preventing it from sliding down. Our new braking system consists of a couple of pieces bolted to the basket, which prevents the basket from slipping, as the wheels do not touch the ground and therefore the basket cannot slide.

GRADE: The maximum incline with which these brakes can be used is 10% on ramps.

MATERIAL: The brake for ramps and escalators is made of high-quality polyethylene, which makes them highly resistant to impacts.

ESD Protection

ESD protection (electrostatic discharge) is an additive that discharges static electricity and maintains the electrical balance of plastic.

ADVANTAGES

Avoid electric shocks caused by air conditioners, dryers, and other devices. The basket does not accumulate dust, hair, or other visible particles, keeping it in its best condition.
